

Application form - regional skills certification program on PV-Diesel hybrid mini-grids of the ECOWAS Regional Certification System for Sustainable Energy Skills

<p>Name of the institution</p>	
<p>Address</p>	
<p>Director <i>Please insert name and contact details</i></p>	
<p>Contact person <i>Please insert name and contact details</i></p>	
<p>Names and contacts of key personnel providing solar PV training (up to five) <i>Please attach CVs showing, among other things, where staff acquired their knowledge and skills in solar PV (academic and short courses, work experience in the private sector) as well as years of training experience in solar PV . This should include the names and types of courses taught by staff (e.g. design and installation of off-grid photovoltaic systems, design and installation of solar pumping systems, etc.)</i></p>	
<p>Solar PV energy courses offered by the institution <i>Please list and describe the solar photovoltaic courses that have been or are being offered by your institution in the past two years. In each case, please provide information on the duration of the course (number of hours), the program used, the frequency with which the course took place and the number of people trained. The course description (s) should include information on the practical training elements, if applicable</i></p>	
<p>Practical training facilities and equipment <i>Please describe the facilities, equipment and tools (eg, solar PV system components, measuring equipment, hardware tools, etc.) available for solar PV training</i></p>	

Choice of partnership (training center or examination center)	
Expectations <i>Please describe your expectations for participating in the program</i>	
Additional information	
Date, Signature and Stamp
